VERSION: LeadLabReportNationalNotificationMapv1.0 dated 8/17/2007.

This Message Mapping Guide describes the content and message mapping specifications for the set of data elements used to communicate information to meet the requirements for Lead Laboratory Report notifications to CDC. The intended audience for this document are the state/local and CDC programs and other public health related organizations interested in using the HL7 V2.5 case notification message specification for transmitting their data elements.

The ORU^R01 - Unsolicited Observation Message is the HL7 standard message used to pass the Nationally Notifiable Condition Report message. The National Notification message is used to convey a de-identified subset of investigation/surveillance information to meet national reporting requirements, where CDC is the only receiver. Additional information about the methodology utilized for national notifications as an ORU message can be found in Section 2 of the MESSAGE STRUCTURE SPECIFICATION for NATIONAL CONDITION REPORTING Version 1.0 document. This document specifies the structure and methodology for the use of the Health Level 7 (HL7) Version 2.5 Unsolicited Result Message (ORU^R01) that supports the electronic interchange of any de-identified Nationally Notifiable Condition message from public health entities to the CDC.

References

Version 1.0 of the <u>Message Specification Guide</u> is used to inform the mapping methodology for this guide. Notify CDC Message—All PAMs from NEDSS PAM Platform Team. Last updated 1/26/2007. NEDSS PAM Platform Help Guide, 11/30/2006.

Understanding the Organization of the Mapping Guide

<u>Data Element Index</u> This tab provides the complete list of data elements of interest requested by the program.

The last column cross-references to the tab where the data element is fully specified for

messaging.

Revisions This tab is intended to provide revision control for updates made to the document.

<u>Key</u> Column descriptions for the tabs using the mapping methodology.

Subject-related This tab provides the mapping methodology for the demographic variables requested by the

program.

<u>Lead Lab Rpt Obs.</u> This tab provides the mapping methodology for the content requested by the program for

this specific notification.

Notification Structure This tab provides the structural elements for the Notification. These variables are not

negotiable. Default values are provided for HL7 structural elements that are required but

not part of the surveillance data requested.

Example This tab contains a message that conforms in structure to the Message Specification Guide

and in content to this version of the Message Mapping Guide. This message is for example purposes and should not be used as the source of truth for coding, data mapping, or other

content.

Variables as Observations

Other than the variables that map to the Patient Identifier segment (see Subject-Specific tab), all other variables are passed as a series of OBX-Observation/Result segments that are logically tied to the OBR-Observation Request "section header" segment that immediately precedes it. This content presents the real differences between the messages since all types of Notifications are handled in a standard manner up to this point.

PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Valid Values	Data Validation	TAB REFERENCE
CORE DE	MOGRAPHIC D	ATA ELEMENTS					•	Subject-related
DEM197	Local patient ID	The local ID of the patient/entity.	Alphanumeric	R				Subject-related
DEM147		Patient ID value assigned by the state	Alphanumeric	0				Subject-related
DEM115	Birth Date	Date of birth in YYYYMMDD format	Date	0				Subject-related
DEM114	Patient's birth sex	Patient's birth sex	Code	0		Male Female Unknown		Subject-related
DEM152	Race Category	Field containing one or more codes that broadly refer to the patient's race(s).	Code	0	Y	American Indian or Alaska Native; Asian; Black or African American; Native Hawaiian or Other Pacific Islander; White; Other Race		Subject-related
DEM165	Patient Address County	County of residence of the subject.	Code	0	Y	FIPS county codes		Subject-related
DEM162	Patient Address State	Patient's address state.	Code	0	Y	FIPS state codes		Subject-related
DEM163	Patient Address Zip Code	Patient's address Zip code.	Alphanumeric	0	Y			Subject-related
DEM155	Ethnic Group Code	Ethnic origin or ethnicity is based on the individual's self-identity of the patient as Hispanic or Latino; choose one value from the list.	Code	0		Hispanic Non-hispanic		Subject-related
EXTENDE	D DEMOGRAPI	HIC DATA ELEMENTS						
DEM153	Detailed Race	A patient record may have zero, one, or multiple detailed race categories assigned. This variable is not passed unless specified for the particular condition.	Code	0	Y	<see download="" vocab=""></see>	Detailed Race	Subject-related

PHIN	Label/Short	Description	Data Type	CDC	May	Valid Values	Data Validation	TAB REFERENCE
Variable ID	Name			Req/Opt	Repeat			
DEM156	Detailed Ethnicity	If the value specified in Ethnicity is Hispanic or Latino, choose detailed ethnicity value(s) that better define the patient's Latino ethnicity; values may include Cuban, Mexican, etc.; choose one or multiple values from this list. This variable is not passed unless specified for the particular condition.	Code	0	Y	<see download="" vocab=""></see>	Detailed Ethnicity	Subject-related
DEM2010	Address ID	The system-assigned unique address ID	Alphanumeric	0	Υ			Subject-related
DEM161	Patient Address City	Patient's address city as text	Alphanumeric	0	Y			Subject-related
DEM168	Census Tract	Census tract where the address is located is a unique identifier associated with a small statistical subdivision of a county. Census tract data allows a user to find population and housing statistics about a specific part of an urban area. A single community may be composed of several census tracts.	Alphanumeric	0	Y			Subject-related
DEM169	Residence From Date	Residence From date.	Date	0	Υ			Subject-related
DEM170	Residence To Date	Residence To date.	Date	0	Y			Subject-related
	REPORT DATA							
INV178	Pregnancy Status	Indicates whether the patient was pregnant during the event.	Code	0		Yes No Unknown		Generic Obs.
NOT109	Reporting State	State reporting the investigation/case	Code	R				Generic Obs.
LEA105	Previous country of residence	Previous country of residence - send the 3 most recent countries.	Code	0	Y			Lead Lab Rpt Observations

PHIN	Label/Short	Description	Data Type	CDC	May	Valid Values	Data Validation	TAB REFERENCE
Variable ID	Name			Req/Opt	Repeat			
LEA137	Travel outside of US	Travel outside of US <future functionality=""></future>	Code	0		Yes No Unknown		Lead Lab Rpt Observations
LAB202	Test ID	System-assigned local test instance identifier.	Text	R				Lead Lab Rpt Observations
LAB165	Specimen Source	The medium from which the specimen originated. Examples include whole blood, saliva, urine, etc.	Code	R		Hair Semen Blood Urine Blood Venous Saliva Blood Cord Unknown Substance Blood Unknown Tissue Culture Scab Blood Capillary Macular Scraping Buccal Swab Vesicular Swab		Lead Lab Rpt Observations
LAB168	Laboratory Result Jurisdiction	The geographic area responsible for managing public health activities including intervention, prevention and surveillance for health event associated with a particular geographic area such as county or city, associated with an event.	Code	R		state-assigned		Lead Lab Rpt Observations
LAB180	Age at time of laboratory test	Age of subject at time of specimen collection	Numeric	0				Lead Lab Rpt Observations
LAB181	Age units at time of laboratory test	Age units of subject at time of specimen collection.	Code	0		Days Months Weeks Years		Lead Lab Rpt Observations
LAB163	Date of specimen Collection	The date the specimen was collected.	Date	R				Lead Lab Rpt Observations
LAB108	Sample Analyzed Date	The date and time the sample was analyzed by the laboratory.	Date	0				Lead Lab Rpt Observations

PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Valid Values	Data Validation	TAB REFERENCE
LAB197	Lab Date	Date result sent from reporting laboratory.	Date	0				Lead Lab Rpt Observations
	Numeric Result Descriptor	Lab quantitative result operator.	Coded	0		= > = < = null		Lead Lab Rpt Observations
LAB114	Numeric result value	The first numeric value in the quantitative result.	Numeric	0				Lead Lab Rpt Observations
LAB115	Result units	The unit of measure for a numeric result value.	Code	0		percent gperdL mmolmol ugperL ugperh umolmol mgperL ugpermL ugpersp mL mIUmL IUperL mgperd umold umolL ugperdL mgperd umol{ZPP}/mol{heme} ngpermL ugperg mgperdL [ppb] [ppm]		Lead Lab Rpt Observations
LAB504	Result Notes	Explanation for missing result, (e.g., clotted, quantity not sufficient, etc.)	Code	0		Unduplicated Wrong Tube Pending Quantity Not Sufficient Test Not Done Clotted Lab Error Contaminated		Lead Lab Rpt Observations

PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Valid Values	Data Validation	TAB REFERENCE
LAB143	Lab Name	Name of Laboratory that reported	Text	0				Lead Lab Rpt
		test result.						Observations
LAB144	CLIA Lab ID	CLIA (Clinical Laboratory Improvement Act) identifier for the laboratory that performed the test.	Text	0				Lead Lab Rpt Observations
LAB120	Limit of detection	Reference range to/limit of detection. The <i>reference range to</i> value allows the user to enter the value on the high end of a valid range of results for the test.	Numeric	0				Lead Lab Rpt Observations
LAB500	Ordering Provider Address - State	Ordering provider address— state.	Code	0				Lead Lab Rpt Observations
LAB501	Ordering Provider Address - City	Ordering provider address— city.	Text	0				Lead Lab Rpt Observations
LAB502	Ordering Provider Address - County	Ordering provider address—county.	Code	0				Lead Lab Rpt Observations
DEM2007	Patient Employer SIC Code	Employer Standard Industrial Classification (SIC) code for the employer associated with the occupation This field may repeat with multiple values.	Code	0				Lead Lab Rpt Observations
DEM2008	Patient Employer NAICS Code	Employer North American Industry Classification System (NAICS) code for the employer associated with the occupation This field may repeat with multiple values.	Code	0				Lead Lab Rpt Observations
DEM139	Census Occupation Code	Patient's Occupation(s). Multiple occupations may be selected.	Code	0				Lead Lab Rpt Observations

Revisions

Date	Version	Description
8/8/2007	Final V 1.0	Notification Structure tab: Updated the value set and OID references for INV169
		condition code.
8/8/2007	Final V 1.0	Added a Data Element Index tab that lists all of the program-specific data elements of interest. The column on the far right of the index contains a reference to the tab on which the data element is mapped to the HL7 message. Since the Valid Values are listed on this tab, the Coded Concepts column was removed from the other tabs.

Key to columns in each Tab/Worksheet:

Program Variables Section
PHIN element UID drawn from the coding system PH_PHINQuestions_CDC
Short name for the data element, which is passed in the message.
Description of the data element as in PHIN Questions.
Data type for the variable response expected by the program area
Indicator whether the program specifies the field as: R - Required - mandatory for sending the message O - Optional - if the data is available it should be passed
Indicator whether the response to the data element may repeat. "Yes" in the field indicates that it may; otherwise, the field is not populated. Repeats require special processing.
Name of the pre-coordinated value set from which the response is drawn. The value sets and coding systems are accessible via the Public Health Information Network Vocabulary Access and Distribution Services at http://www.cdc.gov/PhinVSBrowser/StrutsController.do.
Business rules used for validating data integrity
Message Mapping Methodology Section
Specific HL7 segment and field mapping for the element.
HL7 data type used by PHIN to express the variable.
Indicates if the field is required, optional, or conditional in a segment. The only values that appear in the Message Mapping are: • R – Required. Must always be populated • O – Optional. May optionally be populated.
Indicates whether the field may repeat. The only values that appear in the Message Mapping are: • Y – HL7 allows the field to repeat an indefinite or site-determined number of times. • N or blank – No repetition.
Related implementation comments.

INV178	Pregnancy Status	Indicates whether the patient was pregnant during the event.	Code	0	Yes No Unknown (YNU)		Observation/OBX Segment with this variable ID and label	CWE	0	Y	
INV179	PID	Indicates whether or not the patient has pelvic inflammatory disease (PID).	Code		Only valid for female patients.	Yes No Unknown (YNU)	Observation/OBX Segment with this variable ID and label	CWE	0	Y	
INV2001	Age at time of case investigation	Patient age at time of case investigation	Numeric	0		age units required	Observation/OBX Segment with this variable ID and label	SN	R	Y	
INV2002	Age units at time of case investigation	Patient age units at time of case investigation	Code	0	Age unit		uses the INV2001 observation - maps to OBX-6-Units (does not use INV2002 ID or label)	CE	0	Υ	

Lead Lab Report Notification Variables

		Program-Specific S	Surveillance	Variable	s			Ma	apping N	lethodol	ogy	
PHIN Variable ID	Label/Short Name	Description	Data Type	Prog. Req/Opt	May Repeat	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Option ality	HL7 Repeats	Implementation Notes
LEA105	Previous country of residence	Previous country of residence - send the 3 most recent countries.	Code	0	Y	Country		Observation/OBX Segment with this UID and label under the Patient Subject section header in OBR-4.	CWE	0	Y	expecting only one instance
LEA137	Travel outside of US	Travel outside of US <future functionality=""></future>	Code	0		Yes No Unknown (YNU)		Observation/OBX Segment with this UID and label under the Patient Subject section header in OBR-4.	CWE	0	Y	expecting only one instance
LAB202	Test ID	System-assigned local test instance identifier.	Text	R				OBR-3.1 Filler Order Number (note that the variable ID and label do not appear in the message)	EI	R		Also on the Notification Structure tab
LAB165	Specimen Source	The medium from which the specimen originated. Examples include whole blood, saliva, urine, etc.	Code	R		Specimen		Observation/OBX Segment with this variable ID and label	CWE	0	Y	expecting only one instance
LAB168	Laboratory Result Jurisdiction	The geographic area responsible for managing public health activities including intervention, prevention and surveillance for health event associated with a particular geographic area such as county or city, associated with an event.	Code	R				Observation/OBX Segment with this variable ID and label	IS	0	Y	expecting only one instance
LAB180	Age at time of laboratory test	Age of subject at time of specimen collection	Numeric	0				(note that the variable ID and label do not appear in the message)	SN	0	Y	expecting only one instance
LAB181	Age units at time of laboratory test	Age units of subject at time of specimen collection.	Code	0		Age Unit		(Same Observation/OBX segment as LAB180 - age units maps to <i>OBX-6-Units</i>)	CWE	0	Y	expecting only one instance

		Program-Specific S	Surveillance	Variable	s			Ma	pping N	lethodol	ogy	
PHIN Variable ID	Label/Short Name	Description	Data Type	Prog. Req/Opt	May Repeat	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Option ality		Implementation Notes
LAB163	Date of specimen Collection	The date the specimen was collected.	Date	R				Observation/OBX Segment with this variable ID and label	TS		Y	expecting only one instance
LAB108	Sample Analyzed Date	The date and time the sample was analyzed by the laboratory.	Date	0				Observation/OBX Segment with this variable ID and label	TS		Y	expecting only one instance
LAB197	Result Sent from Lab Date	Date result sent from reporting laboratory.	Date	0				Observation/OBX Segment with this variable ID and label	TS		Y	expecting only one instance
	RESULT GROU	P - all these fields occupy the sa		ation/OB)	K segmer	nt - uses LAB	114 Numeric Resul					
LAB113	Numeric Result Descriptor	Lab quantitative result operator.	Coded	0				OBX Segment tagged with 'LAB114'Numeric result' in OBX-3. This is the value for OBX-5.1. Structured Numeric result in OBX-5 - component 1, the operator, is treated as a string by HL7.	ST		Y	expecting only one instance
LAB114	Numeric result value	The first numeric value in the quantitative result.	Numeric	0			if numeric result not available, must enter LAB504 Result Notes	OBX Segment tagged with 'LAB114'Numeric result' in OBX-3. This is the value for OBX-5.2. Structured Numeric result in OBX-5 - component 2, the first numeric result field.	NM		Y	expecting only one instance
LAB115	Result units	The unit of measure for a numeric result value.	Code	0		Units of measure		Same OBX Segment as 'LAB114^Numeric result' in OBX-3. This is the value for OBX-6.	CE			
End of LA	B114 Numeric R	esult Observation										
LAB504	Result Notes	Explanation for missing result, (e.g., clotted, quantity not sufficient, etc.)	Code	0		Missing Lab Result Reason		Observation/OBX Segment with this variable ID and label	CWE		Y	expecting only one instance
Laborator	y Data											

		Program-Specific S	Surveillance	Variable	S			Ma	pping N	lethodol	logy	
PHIN Variable ID	Label/Short Name	Description	Data Type	Prog. Req/Opt	May Repeat	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Option ality	HL7 Repeats	Implementation Notes
LAB143	Lab Name	Name of Laboratory that reported test result.	Text	0				Observation/OBX Segment with this variable ID and label	ST		Y	expecting only one instance
LAB144	CLIA Lab ID	CLIA (Clinical Laboratory Improvement Act) identifier for the laboratory that performed the test.	Text	0				Observation/OBX Segment with this variable ID and label	ST		Y	expecting only one instance
LAB120	Limit of detection	Reference range to/limit of detection. The reference range to value allows the user to enter the value on the high end of a valid range of results for the test.	Numeric	0				Observation/OBX Segment with this variable ID and label	SN		Y	expecting only one instance
Provider I	Data											
LAB500	Ordering Provider Address - State	Ordering provider address— state.	Code	0		State		Observation/OBX Segment with this variable ID and label	CWE		Y	expecting only one instance
LAB501	Ordering Provider Address - City	Ordering provider address— city.	Text	0		City		Observation/OBX Segment with this variable ID and label	CWE		Y	expecting only one instance
LAB502	Ordering Provider Address - County	Ordering provider address—county.	Code	0		County		Observation/OBX Segment with this variable ID and label	CWE		Y	expecting only one instance
ABLES Da												
DEM2007	Patient Employer SIC Code	Employer Standard Industrial Classification (SIC) code for the employer associated with the occupation This field may repeat with multiple values.	Code	0	Y	Industry (SIC)		Observation/OBX Segment with this variable ID and label	CWE		Y	
DEM2008	Patient Employer NAICS Code	Employer North American Industry Classification System (NAICS) code for the employer associated with the occupation. This field may repeat with multiple values.	Code	0	Y	Industry (NAICS)		Observation/OBX Segment with this variable ID and label	CWE		Y	

		Program-Specific S	Surveillance	Variable		Ma	pping M	ethodol	ogy			
PHIN	Label/Short	Description	Data Validation	Message Context	HL7	HL7	HL7	Implementation				
Variable	Name			Req/Opt	Repeat	Name			Data	Option	Repeats	Notes
ID									Type	ality		
DEM139	Census	Patient's Occupation(s). Multiple	Code	0	Υ	Occupation		Observation/OBX Segment	CWE		Υ	
	Occupation	occupations may be selected.						with this variable ID and				
	Code							label				

These variables are not negotiable. Default values are provided for HL7 structural elements that are required but not part of the surveillance data requested.

Notification Variables									Mapping Methodology					
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Optional ity		Implementation Notes		
NOT108	Notification ID	The unique identifier for the notification record. For the V2 Case Notification, this concept maps to the HL7 attribute MSH-10 Message Control ID. No UID or label is passed in the message.	String	R				MSH-10-Message Control ID. No UID or label is passed in the message.	ST	R				
DEM197	Local patient ID	The local ID of the patient/entity.	String	R				PID-3.1 Patient Identifier List – ID Number PID-3.4 Assigning Authority format <localid&oid&iso> Does not pass Variable ID or label.</localid&oid&iso>	СХ	R	Y	Only the sending system's internally assigned patient id expected for these de- identified messages		
DEM100	Patient name type	Name is not requested by the program, but the Patient Name field is required to be populated for the HL7 message to be valid. Have adopted the HL7 convention for processing a field where the name has been removed for de-identification purposes.	Coded	R		Name Type		PID-5.7 Patient Name Type - second instance (does not pass Variable ID or label). HL7 reserves the first instance of the name for Legal Name.	СХ	R	Y	Literal value: ~^^^S		

Notification Variables									Mapping Methodology					
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Optional ity		Implementation Notes		
LAB202	Test ID	Local test identifier	Text	R				OBR-3.1 Filler Order Number (note that the variable ID and label do not appear in the message)	EI	R	-			
NOT099	Subject Type	Type of subject for the notification.	Coded	R		Notification Section Header		OBR 1 : Maps to the HL7 attribute OBR-4-Universal Service ID. No UID or label is passed in the message.	CE	R		Literal Value: 'PERSUBJ^Pers on Subject^2.16.840 .1.114222.4.5.27 4'		
NOT101	Notification Type	Type of notification. Main notification types are "Individual Case", "Environmental", "Summary", and "Laboratory Report".	Coded	R		Notification Section Header		OBR 2 : Maps to the HL7 attribute OBR-4-Universal Service ID. No UID or label is passed in the message.	CE	R		Literal Value: 'LABNTF^Labora tory Report Notification^2.16. 840.1.114222.4.5 .274'		
NOT103	Submitted	Date the notification was first sent to CDC. This value does not change after the original notification. For the V2 Case Notification, this concept maps to the HL7 attribute OBR-7-Observation Date/time. No UID or label is passed in the message.	Date/time	R				Maps to the HL7 attribute OBR-7- Observation Date/time. No UID or label is passed in the message.	TS	R		<same in<br="" value="">each OBR instance></same>		

Notification Variables									Mapping Methodology					
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Optional ity	HL7 Repeat s	Implementation Notes		
NOT106	Date of Report	Date/time this version of the notification was sent. It will be the same value as NOT103 for the original notification. For updates, this is the update/send date/time.	Date/time	R				Maps to the HL7 attribute OBR-22- Result Report/Status Chg Date/time. No UID or label is passed in the message.	TS	R	-	<same in<br="" value="">each OBR instance></same>		
NOT108	Notification ID	The unique identifier for the notification record. For the V2 Case Notification, this concept maps to the HL7 attribute MSH-10 Message Control ID. No UID or label is passed in the message.	Alphanu meric	R				Maps to the HL7 attribute MSH-10- Message Control ID. No UID or label is passed in the message.	ST	R				
INV169	Condition Code	Condition or event that constitutes the reason the notification is being sent.	Coded	R		Nationally Notifiable Disease Surveillance System (NNDSS) & Other Conditions of Public Health Importance		Maps to HL7 attribute OBR-31- Reason for Study. The UID and label are not passed in the message.	CE	R	Y	Default value in each OBR instance: '32010^Lead Poisoning^2.16.8 40.1.114222.4.5. 277'
